Editors

Professor Roland W. Lewis
School of Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK (*E-mail:* ijnmeuk@wiley.co.uk)

Professor Ted Belytschko
Department of Mechanical Engineering, Northwestern University
Evanston, IL 60208, USA (*E-mail:* ijnme-us@northwestern.edu)

Associate Editors

Professor René de Borst
Koiter Institute Delft, Delft University of Technology
P.O. Box 5058, NL-2600 GB Delft, The Netherlands
(*E-mail:* ijnme@LR.TUDelft.nl)

Professor Charbel Farhat
Department of Mechanical Engineering and Institute for Computational and Mathematical Engineering, Stanford University, Stanford,
CA 94305, USA (*E-mail:* cfarhat@stanford.edu)

Founding Editors

Professor O. C. Zienkiewicz
Department of Civil Engineering, University of Wales Swansea,
Swansea SA2 8PP, UK

Professor R. H. Gallagher†

Editorial Board

J. S. Arora
University of Iowa,
Iowa City, USA

R. J. Astley
University of Southampton, UK

I. Babuska
University of Texas at Austin, USA

K. J. Bathe
MIT, Cambridge, MA, USA

J. L. Batoz
Universite de Technologie Compiegne,
Compiegne, France

Z. P. Bazant
Northwestern University,
Evanston, IL, USA

M. P. Bendsoe
Technical University of Denmark,
Lyngby, Denmark

D. Beskos
University of Patras, Greece

G. F. Carey
University of Texas at Austin, USA

J. L. Chenot
ENSM de Paris, Valbonne, France

Y. K. Cheung
University of Hong Kong

R. W. Clough
University of California,
Richmond, CA, USA

G. Comini
Universita degli Studi di Udine, Italy

C. A. Felippa
University of Colorado, Boulder, USA

J. Fish
Rensselaer Polytechnic Institute, USA

P.-L. George
INRIA, Le Chesnay, France

M. Géradin
ISIS, JRC, Ispra, Italy

R. Haber
University of Illinois at
Urbana-Champaign, IL, USA

R. T. Haftka
Aerospace Eng, Mech & Eng Sci,
Gainesville, FL, USA

T. K. Hellen
Oakfield House, Bristol, UK

T. J. R. Hughes
University of Texas at Austin, USA

S. Idelsohn
Universidad Nacional del Litoral,
Argentina

M. Kleiber
Polish Academy of Sciences, Warsaw,
Poland

P. Le Tallec
Université Paris Dauphine and l'Ecole
Polytechnique, Palaiseau, France

X. K. Li
Dalian University of Technology,
People's Republic of China

W. K. Liu
Northwestern University,
Evanston, IL, USA

G. Maier
Polytechnic of Milan, Italy

H. A. Mang
Technische Universität Wien, Austria

K. Morgan
University College of Swansea, UK

Z. Mroz
Polish Academy of Sciences,
Warsaw, Poland

A. K. Noor
Old Dominion University,
Hampton, VA, USA

J. T. Oden
University of Texas at Austin, USA

R. Ohayon
CNAM, Paris, France

J. Oliver
Technical University of Catalonia,
Barcelona, Spain

E. Oñate
Universidad Politécnica de Catalunya,
Barcelona, Spain

M. Ortiz
California Institute of Technology,
Pasadena, CA, USA

K. C. Park
University of Colorado, Boulder, USA

D. Peric
University of Wales Swansea, UK

E. Ramm
Stuttgart University, Germany

J. N. Reddy
Texas A&M University,
College Station, TX, USA

K. Runesson
Chalmers University of Technology,
Göteborg, Sweden

S. Saigal
Carnegie Mellon University,
Pittsburgh, PA , USA

A. Samuelsson
Chalmers Tekniska Högskola,
Göteborg, Sweden

B. Schrefler
Universita di Padova, Italy

M. S. Shephard
Rensselaer Polytechnic Institute,
Troy, NY, USA

E. Stein
University of Hannover, Germany

R. L. Taylor
University of California, Berkeley, USA

N. P. Weatherill
University of Wales Swansea, UK

P. Wriggers
University of Hannover, Germany

G. Yagawa
University of Tokyo, Japan

Advisory Board

M. Ainsworth
University of Strathclyde,
Glasgow, UK

M. H. Aliabadi
Imperial College, UK

F. Armero
University of California, Berkeley, USA

F. Auricchio
Universitá di Pavia, Italy

D. J. Benson
University of California, San Diego, USA

M. A. Bradford
University of New South Wales,
Australia

J. S. Chen
University of California at Los Angeles
(UCLA), Los Angeles, USA

A. Combescure
LaMCos INSA de Lyon,
Villeurbanne, France

L. Franca
University of Colorado, Denver, USA

D. Givoli
Technion, Haifa, Israel

I. Harari
Tel Aviv University, Israel

A. Huerta
Universidad Politecnica de Catalunya,
Spain

G. M. Hulbert
The University of Michigan, USA

T. A. Laursen
Duke University, Durham,
NC, USA

J. Peraire
Massachusetts Inst of Technology, USA

C. Schwab
ETH Zuerich, Switzerland

O. Sigmund
Technical University of Denmark,
Lyngby, Denmark

P. Steinmann
Universität Kaiserslautern, Germany

K. K. Tamma
University of Minnesota, USA

E. Van der Giessen
University of Groningen, The Netherlands

L. C. Wrobel
Brunel University, UK

N. J. Zabaras
Cornell University, USA

International Journal for
Numerical Methods in Engineering

Volume 62 Number 1 • 7 January 2005

An *a posteriori* error estimator for the *p*- and *hp*- versions of the finite element method: J. E. Tarancón, F. J. Fuenmayor and L. Baeza 1

A refined semi-analytic design sensitivity based on mode decomposition and Neumann series: M. Cho and H. Kim 19

A dynamic approach for evaluating parameters in a numerical method: A. A. Oberai and J. Wanderer. 50

A gradient-only line search method for the conjugate gradient method applied to constrained optimization problems with severe noise in the objective function: J. A. Snyman 72

Parametric design sensitivity analysis of high-frequency structural-acoustic problems using energy finite element method: J. Dong, K. K. Choi, A. Wang, W. Zhang and N. Vlahopoulos 83

On hypersingular surface integrals in the symmetric Galerkin boundary element method: application to heat conduction in exponentially graded materials: A. Sutradhar, G. H. Paulino and L. J. Gray..... 122

Volume 62 Number 2 • 14 January 2005

On solving large strain hyperelastic problems with the natural element method: B. Calvo, M. A. Martinez and M. Doblaré 159

Modelling and process optimization for functionally graded materials: R. S. Bellur-Ramaswamy, R. Haber, N. A. Sobh and D. Tortorelli 186

DSC-Ritz method for high-mode frequency analysis of thick shallow shells: C. W. Lim, Z. R. Li and G. W. Wei 205

Degenerate scale problem when solving Laplace's equation by BEM and its treatment: J. T. Chen, S. R. Lin and K. H. Chen 233

DSC-Ritz method for the free vibration analysis of Mindlin plates: Y. Hou, G. W. Wei and Y. Xiang... 262

Dynamic response and reliability analysis of structures with uncertain parameters: J. Li and J.-B. Chen 289

Volume 62 Number 3 • 21 January 2005

Optimization of double-layer absorbers on constrained sound absorption system by using genetic algorithm: Y.-C. Chang, L.-J. Yeh and M.-C. Chiu 317

Analytical stiffness matrices with Green-Lagrange strain measure: P. Pedersen 334

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

IJNMBH 62 1–2198 (2005) • ISSN 0029-5981

F-bar-based linear triangles and tetrahedra for finite strain analysis of nearly incompressible solids. Part I: formulation and benchmarking: E. A. de Souza Neto, F. M. Andrade Pires and D. R. J. Owen 353

Non-linear analysis of shells with arbitrary evolving cracks using XFEM: P. M. A. Areias and T. Belytschko 384

Using spectral low rank preconditioners for large electromagnetic calculations: I. S. Duff, L. Giraud, J. Langou and E. Martin 416

Formulation of equations of motion of finite element form for vehicle-track-bridge interaction system with two types of vehicle model: P. Lou and Q-y. Zeng 435

Volume 62 Number 4 • 28 January 2005

Finite volume method for simulation of extrusion processes: H. Bašić, I. Dermirdžić and S. Muzaferija 475

GradH-Correction: guaranteed sizing gradation in multi-patch parametric surface meshing: S. Pippa and G. Caligiana 495

A multicriteria evolutionary algorithm for mechanical design optimization with expert rules: R. Filomeno Coelho and Ph. Bouillard 516

Buckling analysis of shear deformable plates by boundary element method: J. Purbolaksono and M. H. Aliabadi 537

A sinh transformation for evaluating nearly singular boundary element integrals: P. R. Johnston and D. Elliott 564

A conforming unified finite element formulation for the vibration of thick beams and frames: S. E. Hirdaris and A. W. Lees 579

Volume 62 Number 5 • 7 February 2005

Second-order analysis and design of steel structures allowing for member and frame imperfections: J. X. Gu and S. L. Chan 601

Numerical analysis of a new Eulerian-Lagrangian finite element method applied to steady-state hot rolling process: J. Synka, A. Kainz, R. Maringer and A. Obereder 616

Numerical simulation of granular materials by an improved discrete element method: J. Fortin, O. Millet and G. de Saxcé 639

A time domain FEM approach based on implicit Green's functions for non-linear dynamic analysis: D. Soares and W. J. Mansur 664

Source terms in Eulerian-Lagrangian contaminant transport simulation: A. E. Croucher and M. J. O'Sullivan 682

Equivalent localization element for crack band approach to mesh-sensitivity in microplane model: J. Červenka, Z. P. Bažant and M. Wierer 700

Volume 62 Number 6 • 14 February 2005

Predicting the coating condition on ships using ICCP system data: E. Santana-Diaz and R. Adey 727

Component-based hybrid mesh generation: K. K. Chand 747

Proper orthogonal decomposition and modal analysis for acceleration of transient FEM thermal analysis: R. A. Białecki, A. J. Kassab and A. Fic 774

Dynamic soil-structure interaction analysis of layered unbounded media via a coupled finite element/boundary element/scaled boundary finite element model: M. Cemel Genes and S. Kocak 798

Solving high order ordinary differential equations with radial basis function networks: N. Mai-Duy 824

Volume 62 Number 7 • 21 February 2005

A combined finite-discrete element method for simulating pharmaceutical powder tableting: R. W. Lewis, D. T. Gethin, X. S. Yang and R. C. Rowe 853

Charge-induced clustering in multifield particulate flows: T. I. Zohdi 870

Anisotropic adaptive simulation of transient flows using discontinuous Galerkin methods: J.-F. Remacle, X. Li, M. S. Shephard and J. E. Flaherty 899

Load-bearing control of slender bridges: A. Tesar 924

The use of cyclic symmetry in EFG analysis for heat transfer problems: H. Yang and L. Liu 937

A new one-point quadrature enhanced assumed strain (EAS) solid-shell element with multiple integration points along thickness: Part I – geometrically linear applications: R. J. Alves de Sousa, R. P. R. Cardoso, R. A. Fontes Valente, J.-W. Yoon, J. J. Grácio and R. M. Natal Jorge 952

Volume 62 Number 8 • 28 February 2005

A numerical analysis of infinitesimal mechanisms: G. Garcea, G. Formica and R. Casciaro 979

A class of variational strain-localization finite elements: Q. Yang, A. Mota and M. Ortiz 1013

An Eulerian finite element formulation for modelling stationary finite strain elastic deformation processes: D. Demarco and E. N. Dvorkin 1038

Time domain modelling of aeroelastic bridge decks: a comparative study and an application: M. Lazzari 1064

Volume 62 Number 9 • 7 March 2005

Forced vibrations in the medium frequency range solved by a partition of unity method with local information: E. De Bel, P. Villon and Ph. Bouillard 1105

An eddy current integral formulation on parallel computer systems: R. Fresa, G. Rubinacci and S. Ventre 1127

Design of a composite beam using the failure probability-safety factor method: E. Castillo, R. Mínguez, A. Ruiz-Terán and A. Fernández-Canteli 1148

Two dimensional mortar contact methods for large deformation frictional sliding: B. Yang, T. A. Laursen and X. Meng 1183

An *hp*-adaptive finite element method for scattering problems in computational electromagnetics: W. Rachowicz and A. Zdunek 1226

A Green's function approach to deriving non-reflecting boundary conditions in molecular dynamics simulations: E. G. Karpov, G. J. Wagner and W. K. Liu 1250

Volume 62 Number 10 • 14 March 2005

ANNOUNCEMENT 1263

Smart element method I: The Zienkiewicz-Zhu feedback: S. Li, X. Liu and A. Gupta 1264

A finite element solution of acoustic propagation in rigid porous media: A. Bermúdez, J. L. Ferrín and A. Prieto 1295

Parameter identification in constitutive models via optimization with *a posteriori* error control: H. Johansson and K. Runesson 1315

Multiscale enrichment based on partition of unity: J. Fish and Z. Yuan 1341

Enhanced *transverse* shear strain shell formulation applied to large elasto-plastic deformation problems: R. A. Fontes Valente, M. P. L. Parente, R. M. Natal Jorge, J. M. A. César de Sá and J. J. Grácio 1360

Interfacial steady-state and transient thermal fracture of dissimilar media using the boundary element contact analysis: G. I. Giannopoulos and N. K. Anifantis 1399

Volume 62 Number 11 • 21 March 2005

Discrete element modelling and simulation of sand mould manufacture for the lost foam process: J. Rojek, F. Zarate, C. Agelet de Saracibar, C. Gilbourne and P. Verdot 1421

The Arlequin method as a flexible engineering design tool: H. B. Dhia and G. Rateau 1442

Dislocations by partition of unity: G. Ventura, B. Moran and T. Belytschko 1463

Coupled three-layered analysis of smart piezoelectric beams with different electric boundary conditions: C. M. A. Vasques and J. D. Rodrigues 1488

A new automatic adaptive 3D solid mesh generation scheme for thin-walled structures: C. K. Lee and Q. X. Xu 1519

On a high-order Newton linearization method for solving the incompressible Navier–Stokes equations: T. W. H. Sheu and R. K. Lin 1559

Volume 62 Number 12 • 28 March 2005

Sparse monolithic compliant mechanisms using continuum structural topology optimization: S. Rahmatalla and C. C. Swan 1579

Boundary element modelling of flat plate floors under vertical loading: Y. F. Rashed 1606

Boundary knot method for some inverse problems associated with the Helmholtz equation: B. Jin and Y. Zheng 1636

Computation of resonant modes for axisymmetric Maxwell cavities using *hp*-version edge finite elements: R. Hiptmair and P. D. Ledger 1652

Fast BEM-FEM mortar coupling for acoustic-structure interaction: M. Fischer and L. Gaul 1677

Finite element implementation of large deformation micropolar plasticity exhibiting isotropic and kinematic hardening effects: P. Grammenoudis and Ch. Tsakmakis 1691

Optimal control of an induction heating process using automatic differentiation: A. Masserey and J.-R. Poirier 1721

Volume 62 Number 13 • 7 April 2005

Improved genetic algorithm for design optimization of truss structures with sizing, shape and topology variables: W. Tang, L. Tong and Y. Gu 1737

A framework for fracture modelling based on the material forces concept with XFEM kinematics: R. Larsson and M. Fagerström 1763

Vibrations of skewed cantilevered triangular, trapezoidal and parallelogram Mindlin plates with considering corner stress singularities: C. S. Huang, A. W. Leissa and M. J. Chang 1789

Finite element matrices in congruent subdomains and their effective use for large-scale computations: A. Suzuki and M. Tabata 1807

On the implicit integration of rate-dependent inelastic constitutive models: R. Kouhia, P. Marjamäki and J. Kivilahti 1832

Continuum-discontinuum modelling of shear bands: E. Samaniego and T. Belytschko 1857

An interface strip preconditioner for domain decomposition methods: application to hydrology: R. R. Paz and M. A. Storti 1873

Volume 62 Number 14 • 14 April 2005

A fast multi-level convolution boundary element method for transient diffusion problems: C.-H. Wang, M. M. Grigoriev and G. F. Dargush 1895

Integration of geometric design and mechanical analysis using B-spline functions on surface: H. Y. Roh and M. Cho 1927

A computational stream function method for two-dimensional incompressible viscous flows: M. H. Kobayashi and J. M. C. Pereira 1950

An efficient algorithm for modelling progressive damage accumulation in disordered materials: P. K. V. V. Nukala, S. Šimunović and M. N. Guddati 1982

Discrete material optimization of general composite shell structures: J. Stegmann and E. Lund 2009

Vibration analyses of a portal frame under the action of a moving distributed mass using moving mass element: J.-J. Wu 2028

Volume 62 Number 15 • 21 April 2005

A non-reflecting layer method for non-linear wave-type equations on unbounded domains with applications to shape alloy rods: M. Newman, A. Safjan, P. Popov and D. C. Lagoudas 2053

Exponential finite elements for diffusion-advection problems: A. El-Zein 2086

Bayesian meta-modelling of engineering design simulations: a sequential approach with adaptation to irregularities in the response behaviour: A. Farhang-Mehr and S. Azarm 2104

Simulation of light-weight membrane structures by wrinkling model: R. Rossi, M. Lazzari, R. Vitaliani and E. Oñate 2127

Explicit Newmark/Verlet algorithm for time integration of the rotational dynamics of rigid bodies: P. Krysl and L. Endres 2154

Optimum design of structures against earthquake by discrete wavelet transform: E. Salajegheh, A. Heidari and S. Saryazdi 2178

Author Index 2193

Key Word Index 2195
